**PART I – EXPLANATION OF PROPOSED REVISED RATE STRUCTURE**

**Overview of Rate Proposal for Fiscal Year 2019**

(July 1, 2018 - June 30, 2019)

The New Jersey Water Supply Authority (Authority) is proposing to adjust its Schedule of Rates, Charges and Debt Service Assessments for the sale of water from the Manasquan Reservoir Water Supply System (System), to cover expenses for the Fiscal Year (FY) starting on July 1, 2018.

The Authority operates and maintains the System including the Intake Facilities located in Wall Township adjacent to Hospital Road, the Manasquan Reservoir located in Howell Township and 5 1/4 miles of 66-inch diameter pipeline which connects the Intake Facilities to the Reservoir. The Authority also operates and maintains a water treatment plant located on the same site as the Reservoir Intake Facilities and approximately 39,000 feet of transmission piping. This treatment plant/transmission system was constructed and is being operated by the Authority for the Southeast Monmouth Municipal Utilities Authority (SMMUA) on behalf of the Boroughs of Brielle, Spring Lake, Spring Lake Heights, Sea Girt and Wall Township, which have entered into agreements with SMMUA for the treatment/transmission of their portion of the supply from the System.

**Summary of Proposed Adjustments**

**Initial Water Purchase Contracts of 15.008mgd (15.695mgd at July 1, 1990 and 14.980mgd at July 1, 2015) and Shorelands (.028mgd) delayed water contract effective July 1, 2006:**

Component	Current (FY2018) Rates Per MG 7/1/2017 – 6/30/2018	Proposed (FY2019) Rates Per MG 7/1/2018 – 6/30/2019
Operations & Maintenance Component	\$432.87	\$432.87
Source Water Protection Fund Component	15.00	15.00
Debt Service Cost Component	570.55	570.55
NJEIFP Debt Component	24.93	24.93
<b>TOTAL RATE</b>	<b>\$1,043.35/mg</b>	<b>\$1,043.35/mg</b>

**New Jersey American Water Delayed Water Purchase Contracts Effective July 1, 2001, October 1, 2002 and January 1, 2005 (4.435mgd):**

Component	Current (FY2018) Rates Per MG 7/1/2017 – 6/30/2018	Proposed (FY2019) Rates Per MG 7/1/2018 – 6/30/2019
Operations & Maintenance Component	\$432.87	\$432.87
Source Water Protection Fund Component	15.00	15.00
Debt Service Cost Component	664.96	664.96
NJEIFP Debt Component	24.93	24.93
<b>TOTAL RATE</b>	<b>\$1,137.76/mg</b>	<b>\$1,137.76/mg</b>

\*

\*

\*

The General Rate Schedule for Operations and Maintenance (O&M) was last adjusted effective July 1, 2017 to cover the operating expenses of the System for FY2018. The FY2018 sales base was 19.443 million gallons per day (mgd). The Authority anticipates that the applicable raw water O&M sales base for FY2019 will remain the same at 19.443 mgd. The initial sales base will remain the same at 15.008mgd and the delayed sales base will remain at 4.435mgd.

After the allocation of appropriate Headquarters General and Administrative costs to the System, the Authority anticipates \$3,069,825 in O&M component revenue required during FY2019 with an O&M rate component of \$432.87 per million gallons, no change from FY2018, starting on July 1, 2018 (Schedule 20, page 41). The proposed operating expense budget for FY2019 is \$136,250 less than FY2018 and the proposed Capital Equipment Budget, net of depreciation reserve, is \$5,200 more than FY2018. In FY2019 there will be a \$10,000 contribution to the Sediment Reserve Fund, a \$120,000 contribution to the Renewal and Replacement Fund, a \$5,000 contribution to the Formal Dam Inspection Reserve, and a \$15,000 contribution to the High Voltage Testing Reserve Fund, the same as in FY2018. In FY2019 there will be no contribution to the Other Post-Employment Benefits Reserve and no Supplemental Renewal and Replacement Fund contribution. The OPEB Reserve is fully funded. See Budget Summary on page 19.

A credit of \$114,905 is owed from the SMMUA Water Treatment Plant and Transmission System to the Manasquan Reservoir for actual FY2017 salaries and fringe expenses and will be applied to the CY2018 SMMUA budget (Schedule 15, pages 34-36).

Miscellaneous revenue and interest income in FY2019 is projected to decrease by \$262,150 relative to FY2018 reflecting stable interest earnings (Schedule 16, page 37) and a decrease in the use of year end surplus available from FY2017 (Schedule 17, page 38). Overdraft revenue of \$188,350 is available from the summer of 2016 and 2017.

The System was financed with loans from the State of New Jersey and a Debt Service Assessment for contracts, effective as of July 1, 1990, was established to cover debt service payments on the initial loan of \$63,600,000 at a set interest rate of 7.15 percent and payment of the interim completion loan of \$7,416,000 at an interest rate of 7.16 percent. During FY1992 the State of New Jersey reduced the interest rate on the completion loan to 6.24 percent. During FY1997, the Authority negotiated an agreement with the State of New Jersey, which reduced the interest rate on the \$63,600,000 original State Loan Notes from 7.15 percent to 5.93 percent effective for the payments due on or after August 1998. The Debt Service component of the rate has been adjusted in the past to reflect the revised debt service schedules.

In August of 2005, the Authority refunded the current portion of the State Loan Notes and the Completion Notes at an average coupon of 4.83 percent and net present value savings of \$6.187 million. The terms of the bonds were 15 and 25 years respectively. The bond proceeds also fully funded the Debt Service Reserve Account.

On April 26, 2016, the Authority issued \$17,460,000 in Manasquan Reservoir Water Supply System Refunding Bonds, Series 2016. The proceeds, together with other monies on deposit, were used to prepay \$23,242,358 in Manasquan Reservoir Water Supply System Revenue Bonds, Series 2005 and Current Manasquan State Loan Notes and Completion Notes. The Refunding Bonds carry a bond yield of 1.59%, and mature in incremental annual principal amounts through 2031. The debt service component of the rate represents 120 percent of the principal and interest requirements and debt service coverage must remain at 120 percent through the life of the bonds.

The current refunding resulted in a difference between the par amount of the refunding bonds and the par amount of the refunded bonds of \$5,782,358. The net premium on the refunding bonds was \$1,821,414. The economic gain was a net present value debt savings of \$2,999,861.

The Debt Service component of the rate for the Initial Water Purchase Contracts will be \$570.55 (no change from FY2018) and \$664.96 (no change from FY2018) for the Delayed Water Purchase (DWP) Contracts in FY2019. These changes reflect 120 percent debt service coverage.

The Authority established a Source Water Protection Fund Component in FY2004 dedicating \$15.00 per million gallons to protect the quality and quantity of water in the Manasquan Water Supply System. The Authority decreased the rate component by \$5.00 per million gallons from \$15.00 to \$10.00 for this fund in FY2016. In order to cover program needs the Authority increased the rate by \$5.00 per million gallons to restore the rate to \$15.00 per million gallons in FY2018. The Authority recommends no change to the rate of \$15.00 per million gallons in FY2019.

The Authority closed on a loan to the New Jersey Environmental Infrastructure Financing Program (NJEIFP) on May 3, 2012 to finance the construction of a building structure over the Intake Pump Station and traveling water screens to protect the infrastructure from degradation by the elements. The final interest on the loan is based on 75 percent at zero interest and 25 percent market rate with coupons up to 5 percent for an effective interest rate of .8 percent over the twenty year life of the loans. The rate component of \$24.93 per million gallons in FY2019 is required to cover debt

service payments in accordance with the schedule and is no change from the FY2018 rate.

The base contract O&M Rate (\$432.87), Source Water Protection Program Rate (\$15.00), Debt Service Rate (\$570.55) and NJEIFP Debt Rate (\$24.93) comprise the total base contract rate for raw water of \$1,043.35 per million gallons, and represent no change relative to FY2018. This base contract rate is charged to all uninterruptible service contracts executed prior to July 1, 1990 (and renewed at July 1, 2015), the commencement date of Manasquan Reservoir System operations, and one Delayed Water Purchase contract with Shorelands Water Company executed on July 1, 2006. In order for its customers to be assessed the base contract rate on the .028mgd delayed contract, Shorelands Water Company prepaid the net present value of the difference between the initial water purchase contracts debt service schedule and the delayed water purchase contracts debt service schedule.

The total rate for delayed water purchase contracts in FY2019 is \$1,137.76 per million gallons representing no change relative to the FY2017 delayed water purchase rate. The O&M Component (\$432.87), the Source Water Protection Fund Component (\$15.00), the Debt Service Rate Component (\$664.96) and NJEIFP Debt Rate (\$24.93) comprise the total rate.

Table 1 (page 15) contains a summary of the proposed base contract rate and delayed water purchase contract rate components. The proposed rates shown in Table 1 are effective July 1, 2018 through June 30, 2019. These rates are based upon the projected operating costs and reflect an estimated contracted sales base of 19.443mgd.

Table 2 (page 16) is a twenty-year history of the total initial water purchase contract annual water rate.

Table 3 (page 17) is a fifteen-year history of the combined delayed water purchase contract annual water rates.

Water use payments are to be made quarterly with due dates of October 10, 2017, January 10, 2018, April 10, 2018 and July 10, 2018.

The balance of this document contains a further discussion of the individual rate components, a Schedule of Events and detailed supporting information for the proposed rate adjustment.

### **Schedule of Events**

A pre-public hearing on the proposed rate adjustment is scheduled at 11:00 a.m. on Thursday, January 11, 2017, at the Authority's Manasquan Administration Building, Hospital Road, Wall, New Jersey.

A public hearing on the proposed rate adjustment is scheduled at 11:00 a.m. on Thursday, February 8, 2017, also at the Authority's Manasquan Administration Building in Wall, New Jersey. The public hearing record is scheduled to close on March 19, 2018.

The Authority will take final action on the proposed rate adjustment at its June 4, 2018 meeting at the Authority's Administration Building in Clinton, New Jersey.

### **Distribution of Headquarters General and Administrative Costs and Insurance Costs to all Operating Systems**

On July 1, 1990 the Authority placed the Manasquan Reservoir Water Supply System in operation to provide an untreated water supply for use throughout Monmouth County. In addition to this major System, the Authority also began operation of the Water Treatment Plant and Transmission System for the Monmouth County Improvement Authority (MCIA) on July 1, 1990. The Boroughs of Brielle, Spring Lake, Spring Lake Heights, Sea Girt and Wall Township entered into agreements with the MCIA for this treatment/transmission system, which treats and conveys their portion of the supply from the Manasquan Reservoir Water Supply System. In December 2008, the five member communities created the Southeast Monmouth Municipal Utilities Authority and in September 2009 purchased the Water Treatment Plant from the MCIA and the Authority continues to operate the Water Treatment Plant. The Authority also operates the Spruce Run/Round Valley Reservoirs Complex and the Delaware and Raritan Canal Water Supply Transmission Complex comprising the Raritan Basin System, headquartered in Clinton, New Jersey. As a result, the Authority is operating, maintaining and managing three distinct Systems each with its own budget, cost accountability and revenue stream.

The Authority's headquarters staff located in Clinton provides general and administrative support services for all three Systems. These services include, but are not limited to, Financial Management, Payroll, Human Resources, Purchasing, Contract Administration, Risk Management, and overall management.

In order to equitably assess the customers of each of the three Systems, the Authority previously retained the services of an auditing firm to develop a methodology for the allocation of the Headquarters General and Administrative costs to all three operating Systems. After the close of each fiscal year, the Authority's current Auditors provide the Authority with their findings as to the adjustment, if any, of the allocation factors and the actual audited expenditures for the fiscal year.

The audit report for the immediately preceding fiscal year ending June 30 is available during November. Each September the Authority formulates the proposed budgets for the upcoming fiscal year starting on the following July 1. The adjusted allocation factors, if any and the audited expenditures for the previous fiscal year are used to establish a debit or credit for each of the three operating Systems. This debit or credit is applied to the budgets being prepared each September for the upcoming fiscal year starting on July 1.

An independent auditor performed the Authority's fiscal year 2017 audit. The audit included a review of the allocation factors, as well as the actual audited expenditures. The appropriate adjustments have been made to the FY2019 budget based on the FY2017 audit. A copy of the Auditor's report on the allocation of the Headquarters General and Administrative costs is included in the Appendices to the rate proposal package for each System.

Insurance costs are also allocated to each System based upon the recommendations of the Authority's Risk Management Consultant. See the rate proposal package for additional information.

### **Distribution of Costs Between the Manasquan Reservoir System and the Treatment Plant/Transmission System**

A common staff operates the System and the Treatment Plant/Transmission System. Salaries are allocated between the two Systems based upon time records that were kept during the fiscal year ending on June 30, 2017. The percentages used to provide the basis for the salary allocation for FY2019, were established from the time records from FY2014 through FY2017. A listing of all positions and the percentage of each position's time assigned to each of the two Systems appear on Schedule 2 (page 21).

Detailed budgets have been prepared for the Manasquan Reservoir System and the Treatment Plant/Transmission System. Each System's budget has three main categories of annual operational expenses in addition to the allocation of headquarters overhead. The three categories include (a) salaries and fringes (b) direct operation and maintenance expenses and (c) general and administrative expenses. Part 2 of this document provides more information on both Systems including detailed summaries of the projected line item budget figures for General and Administrative expenses and Operations and Maintenance expenses for FY2019.

### **Analysis of Significant Changes in Operations and Maintenance Expenses and Sales Base - Manasquan Reservoir System**

#### **Overview of Sales Base**

On July 1, 1990 the Authority placed the Manasquan Reservoir Water Supply System in operation to provide an untreated water supply for use throughout Monmouth County. Twelve of the 13 original water purchase contracts were renewed effective July 1, 2015 and expire June 30, 2040. The final customer contract, New Jersey American, consolidated the initial water purchase and delayed water purchases for a total of 12.5mgd and has an expiration date of June 30, 2031. Of the 13 contracts, six are two-party contracts with the New Jersey Water Supply Authority. These are the five treated water customers (Wall Township and the Boroughs of Brielle, Sea Girt, Spring Lake and Spring Lake Heights) of the Southeast Monmouth Municipal Utilities Authority's water treatment plant operated by the New Jersey Water Supply Authority and the New Jersey American Contract. One is a three party contract (Keyport Borough) among the Authority, the customer and Shorelands Water Company for the delivery of water through Shorelands' distribution system. Six contracts (the Boroughs of Avon, Belmar, Matawan, Red Bank and Lake Como, and Shorelands Water Company) are three party contracts among the Authority, the customers and New Jersey American for the provision of treated water from New Jersey American. The total sales base dropped from 20.560 to 19.443mgd effective July 1, 2015 and remains the total for FY2019.

## Overview of Projected Operational Expenses

The Authority's proposed FY2019 Manasquan Reservoir Total Expense budget is \$122,250 less than the current FY2018 budget. The allocation of Authority Headquarters General and Administrative Expenses in FY2019 increases by \$14,000 over FY2018. Capital Equipment budget for FY2019 is \$5,200 more than FY2018. There will be no FY2019 contribution to the Depreciation Reserve account, Insurance Reserve, or Pumping Reserve. There will be a \$10,000 contribution to the Sediment Reserve, a \$5,000 contribution to the Formal Dam Inspection Reserve, and a \$15,000 contribution to the Reserve for High Voltage Testing. Formal Dam Inspections and High Voltage Testing are performed every three years and rather than raising the entire amount every third year, budget stability is created by raising one third of the cost every year. There will be a normal contribution to the Renewal and Replacement Fund of \$120,000. There will be no contribution to the reserve for other post-employment benefits (accrued sick leave payments for retirees) which was created in FY2017. Miscellaneous revenue and interest income decreases by \$262,150. These factors contribute to a \$14 increase in the total FY2019 O&M Component requirement relative to FY2018 (\$3,069,811 vs. \$3,069,825). (Budget Summary on page 19)

Total O&M Direct Expenses are decreasing by \$29,948 from FY2018. The largest contributor is a decrease in Sediment Removal costs. The Authority is again funding a water quality gaging station upstream at Squankum which will be operated by the USGS and will be useful to the Authority in attempting to determine the root cause of changes to water quality and color in the Manasquan River Basin over the past several years.. General and Administrative Expenses allocated to the Reservoir System are decreasing by \$17,298 from FY2018.

## Salaries, Overtime and Benefits

One of the three union contracts under which Authority employees operate is not yet negotiated. The previous contract expired June 30, 2015. The FY2019 budget assumes a 1.5% cost of living adjustment payable July 1, 2018. This is the cost of living adjusted awarded in the International Federation of Professional and Technical Engineers (IFPTE) and International Brotherhood of Electrical Workers (IBEW) contracts. The IFPTE, AFL-CIO, represents the Authority's Maintenance, Craft and Security Units and the Communications Workers of America (CWA) represents the Authority's Administrative and Clerical, Primary Level and Higher Level Supervisors Units. The International Brotherhood of Electrical Workers (IBEW) represents two managers from the Raritan system and one from the Manasquan system.

The Authority has built in 32 percent per year growth for Pension contributions over actual FY2017. Although increases have stabilized in the last three years, there is still a level of uncertainty in this expense item because the pension system remains significantly underfunded.

Total salary and fringe is increasing by \$28,564 for FY2019 from FY2018, and the portion allocated to the Reservoir System is decreasing by \$89,000. The four-year averaging of allocation between the Reservoir System and the Treatment Plant projects has stabilized the movement of salary dollars to the Reservoir System from the Treatment Plant. In FY2019, 46 percent of total salary and fringe is allocated to the Reservoir System and 54% to the Treatment Plant. The number

of budgeted positions in FY2019 is 27, which is the same as FY2018. (Schedule 2, page 21) The Authority is budgeting 68 percent of the salary budget for fringe benefits in FY2019 which is inclusive of retiree medical.

### Retiree Health Benefits

Employees who retired with a minimum of 25 years of service prior to July 1, 1997 are entitled to paid health benefits. For those who attain 25 years on or after July 1, 1997, share some portion of post-retirement health benefit costs with the employer as determined by union contract or bargaining unit agreement. The Authority retiree health benefits expense item is increasing in FY2019 from \$165,000 to \$204,300. The original retirement estimates for FY2018 were not realized and unless there are an unusually high number of retirements in FY2019, the line item should be adequate (\$93,713 increase over FY17 actual). Because there are only five retirees at present in the Manasquan System, each additional retiree will drive a large increase on a percentage basis. The FY2019 budget plans for three additional retirees, the same number that was budgeted for FY2018 but not realized.

### Insurance Program

The Authority is recommending a \$4,419 increase in insurance expenses for FY2019 reflecting general market conditions based on the advice of the Authority's insurance broker and consultant. As always, the Authority will review the rate projection for FY2019 in February 2018 to determine if adjustments are necessary.

Allocation of the Primary, Umbrella and Public Officials Liability insurance costs between the three Systems is based upon proportionate water sales. The Automobile Liability cost is allocated based upon the assignment of vehicular equipment to each System. The cost of the Business Property coverage is allocated on the basis of insured values for each System and the Workers Compensation premiums are allocated on the basis of salaries for each System.

### Fees and Permits

Staff proposes a FY2019 budgetary line item of \$35,500 for fees and permits reflecting no change over FY2018.

### Headquarters General and Administrative Expenses

Budgeted Headquarters General and Administrative Expenses in FY2019 total \$810,843 of which \$698,565 is charged to the Manasquan Reservoir System and \$112,278 is charged to the Manasquan Water Treatment Plant (Schedule 13, page 32). Because actual audited Headquarters Expenses were lower than the budget for FY2017 by \$32,900 that difference must be credited in FY2019 resulting in an adjusted charge to the Reservoir System of \$666,000. Headquarters charges are driven primarily by salary and fringe.

## **Interest Income and Miscellaneous Revenue**

The projected interest earnings on reserve funds for FY2019 are \$17,300. This reflects an increase of \$4,100 relative to FY2018 and is based upon an interest rate of .25 percent for short-term investments and a rate of 1.30 percent on long-term investments (See Schedule 16, page 37).

## **Reserve Contributions**

Consistent with FY2018, there will be no FY2019 contribution to the Depreciation Reserve account, the Insurance Reserve or the Pumping Reserve. There will be a \$10,000 contribution to the Sediment Reserve. There will be a regular \$120,000 contribution to the Renewal and Replacement Fund, a \$5,000 contribution to the Reserve for Formal Dam Inspections and a \$15,000 contribution to the Reserve for High Voltage Testing. Formal Dam Inspections and High Voltage Testing are performed every three years and rather than raising the entire amount every third year, budget stability is created by raising one third of the cost every year. There were two new reserve fund contributions in FY2017 which will not be funded in FY2019. There was a supplemental contribution of \$350,000 to the Renewal and Replacement Fund in FY2017 that is not required in FY2019. The Authority requires a minimum balance of \$2 million in the fund to cover dam emergencies, and pipeline and pump emergent repairs. Because the system is aging, there are normal maintenance expenditures included in the five year plan that would have drawn the fund down below the \$2 million requirement without the supplemental deposit. Finally, the Authority funded a reserve for other post-employment benefits (accrued sick leave) in FY2017 in order to assure that sufficient funds are available to pay out sick benefits as this number is not regularly budgeted in salary and fringe.

## **Review of Reserve Accounts**

### **Depreciation Reserve Account**

This reserve is intended to provide for the replacement of Authority machinery and equipment with a value of \$1,000 or more and a useful life in a range from three to ten years and to cushion the impact of replacement equipment purchases in order to provide more stable rates. Depreciation Reserve should equal accumulated depreciation for this class of assets. At August 31, 2017, the balance in Depreciation Reserve of \$579,163 is equal to accumulated depreciation. Therefore, no contribution is required in FY2019.

### **Self Insurance Reserve**

The Self Insurance Fund (\$233,382 balance at August 31, 2017) was established for the System to allow the Authority to make choices between underwritten risk and self-insurance risk in the face of increased prices in the insurance market. No contribution is being made to the fund in FY2019.

### Reserve for Operations and Maintenance

A working cash reserve must be maintained at a level, which reflects the amount of the regular annual operating costs plus an allowance for possible extraordinary requirements. The level of this reserve must equal 25 percent of the Annual O&M Budget. An initial contribution of \$125,000 was budgeted in FY1991. A contribution of \$125,000 was budgeted in FY1992. The contribution for FY1993 was \$50,000 because of the availability of additional revenue from FY1991.

An additional \$100,000 was added during FY1993 from the receipt of delinquent revenue and resulted in full funding of this reserve. The Reserve for Operations and Maintenance Fund is fully funded as of June 30, 2016 and as a result, no contribution will be needed in FY2019.

### Renewal & Replacement Reserve

The Renewal & Replacement Reserve is to be used for costs of capital improvements including repairs to facilities not covered by insurance and payment of extraordinary O&M costs. As per the terms of the project financing, this Reserve is to be funded by the excess debt service coverage revenue after the Debt Service Reserve requirement has been accumulated. An initial deposit of \$24,287 had been made into this account from overdue revenue received during FY1993. Excess annual debt service coverage amounts were later transferred into this fund. The balance in the Fund as of August 31, 2017 is \$3,827,720. Excess interest earnings on the Debt Service Reserve and Debt Service Funds and excess debt service coverage revenue as well as a direct deposit of \$120,000 provide the source of funds for this reserve account.

### **Source Water Protection Fund Rate Component**

The Authority established its Watershed Protection Unit in 1999 to implement a watershed management program for the Raritan River Basin pursuant to a Memorandum of Agreement with the New Jersey Department of Environmental Protection. Primary functions of the Unit are planning for watershed protection, development and implementation of projects that improve protection of water supply.

As an extension of that program during the period of FY2004, the Authority began the Manasquan Watershed Protection Initiative, and established the Source Water Protection Fund for the purpose of protecting the quality and quantity of water in the Manasquan Reservoir Water Supply System. The fund is used for three purposes in cooperation with State, local and nonprofit partners: (1) administrative assistance in the preservation of those properties in the Manasquan River Basin that are critical to the long-term protection of water quality and quantity in the Manasquan Reservoir Water Supply System as they may affect Authority customers; (2) improved management of land development by municipal, county, and State government to protect both water quality and flow to and within Authority facilities; and (3) remedial projects to improve water quality from existing conditions.

Whenever possible, the Authority will seek to obtain funding from other sources to augment

or match its expenditures from the Source Water Protection Fund. The balance in the Source Water Protection Fund at August 31, 2017 is \$1,511,666. Because of overall rate considerations in prior years, the Authority reduced the Source Water Protection Fund Component from \$15.00 per million gallons to \$10.00 per million gallons in FY2016 and FY2017 and reinstated the rate to \$15.00 per million gallons in FY2018 to ensure adequate funding for these initiatives. The Authority proposes no change to the rate in FY2019.

### **Optional Water Use Schedule**

The Authority continues allowing the use of an Optional Water Use Schedule. When the total of all uninterruptible supply contract diversions is equal to or less than 25mgd, the Purchaser may operate pursuant to an optional water use schedule wherein the Purchaser may divert up to 20 percent in excess of the total contracted amount for any given month.

### **Overdraft Service**

The Authority continues to charge an Overdraft Service Rate by recognizing that daily overdraft service rates apply to all uninterruptible service contract customers, and by recognizing that the daily overdraft service rate is a multiple of the initial water purchase rate.

### **Other Rule Amendments**

There are no other rule amendments for FY2019.

**PART II – DETAILED SUPPORTING INFORMATION**

NEW JERSEY WATER SUPPLY AUTHORITY  
MANASQUAN RESERVOIR WATER SUPPLY SYSTEM

**Table 1 - Summary Of Proposed Fiscal Year 2019 Adjustments**

BASED ON PRESENT USAGE

The rates, charges and debt service assessments listed below shall be paid for raw water allocated by contract from the Manasquan Reservoir System for the **base contracts effective as of July 1, 2015 (14.980mgd), and Shorelands (.028mgd) delayed water contract effective July 1, 2006:**

I. July 1, 2018 to June 30, 2019

Rate Component	Current	Original Proposal 12/05/17	Difference	Percentage Increase (Decrease)
Operations & Maintenance Expense Component	\$432.87	\$432.87	⇒ \$0.00	0.00%
Source Water Protection Fund Component	\$15.00	\$15.00	⇒ \$0.00	0.00%
Debt Service Cost Component	\$570.55	\$570.55	⇒ \$0.00	0.00%
NJEIFP Debt Component	\$24.93	\$24.93	⇒ \$0.00	0.00%
Total Rate	\$1,043.35/mg	\$1,043.35/mg	⇒ \$0.00	0.00%

The rates, charges and debt service assessments listed below shall be paid for raw water allocated by contract from the Manasquan Reservoir System for all **New Jersey American Water delayed water purchase contracts effective: July 1, 2001 (1mgd), October 1, 2002 (1.935mgd), January 1, 2005 (1.500mgd):**

II. July 1, 2018 to June 30, 2019

Rate Component	Current	Original Proposal 12/05/17	Difference	Percentage Increase (Decrease)

**Schedule of Events**

(N.J.A.C. 7:11-4.1 et.seq.)  
To become effective July 1, 2017

**2017**

- SEPTEMBER 28 Advise Water Users of informal meeting.
- NOVEMBER 2 Informal meeting with Water Users – 11:00 AM.
- DECEMBER 4 Board reviews and approves proposed Rates.
- 22 Mail Official Notice to water customers, Rate Payer Advocate, interested parties and advertise in newspapers.

**2018**

- JANUARY 2 Publication in the New Jersey Register.
- 11 Pre-Public Hearing – 11:00 AM (within 45 days of Official Notice).  
Deadline for responses to inquires received prior to pre-public hearing.
- FEBRUARY 2 Deadline for receipt of comments to be addressed at Public Hearing  
(15 days after pre-public hearing).
- 8 Public Hearing Meeting. (Manasquan Administration Building) – 11:00  
AM Deadline for responses to inquires received between pre-public and  
public hearing.
- 26 Written responses to questions raised at Hearing (within 10  
business days of the public hearing).
- MARCH 3 NJ Register Comment Period Ends.
- 19 Public Hearing record closes (25 business days after  
Public Hearing).
- JUNE 4 Board approval of FY 2019 Rates and Budgets.
- JULY 1 Effective date.

**Paul McKeon, P.E., Manasquan System Manager**

**MANASQUAN WATER SUPPLY SYSTEM  
RENEWAL/REPLACEMENT RESERVE & CAPITAL IMPROVEMENT PROGRAM  
Fiscal Years 2018-2022  
Updated July 2017**

## **Introduction**

The New Jersey Water Supply Authority (Authority) operates and maintains the Manasquan Water Supply System including the Intake Facilities located in Wall Township, the Manasquan Reservoir located in Howell Township and 5-1/4 miles of 66-inch diameter pipeline which connects the Intake Facilities to the Reservoir. The Manasquan Water Supply System was constructed between 1987-1990 and commenced operation on July 1, 1990.

Construction of this system was financed by the issuance of Bonds under the authorization of Authority Bond Resolution No. 295 dated April 16, 1987. The Bond Resolution provides for rates for water use to include an excess payment of 20% (effective February 1, 1994) of the annual debt service, identified as 120% debt service coverage. During the initial years, this excess payment flowed into the debt service reserve account until an amount equal to 50% of the annual debt service had been accumulated. Thereafter, the 20% excess debt service is to be used to establish a Renewal & Replacement Reserve and to fund a Capital Improvement Program (CIP) for the facilities.

A Capital Improvement Program funded by the Renewal and Replacement Reserve was first recommended in September 1996. This is an update of the CIP.

The Renewal and Replacement Reserve for Extraordinary Operations and Maintenance Costs is fully funded as recommended.

## **Renewal and Replacement Reserve for Extraordinary Operations and Maintenance Costs**

### **Problems with the Earthen Dam Embankments**

The Manasquan Reservoir dam and dikes are inspected by the Authority's operations and engineering staff to provide early detection of situations which, if uncorrected, could lead to serious problems. There are no indications of problems with any of the embankments at the present time. It is unlikely that a major catastrophic dam failure will occur as a result of the weather. A more common occurrence would be surface erosion especially in areas where good turf is not established. The periodic inspection of the embankments shows good establishment of turf. On-site maintenance staff has implemented various measures to improve the grass cover on the dams. Continued long-term success of these measures is dependent on continued maintenance and weather.

The Reserve includes funds that can be used to repair any surface erosion that cannot be repaired by Authority maintenance forces.

### **Replacement of Pipe under Interstate Route 195**

The Manasquan Reservoir pipeline is a 5-1/4 mile long, 66-inch diameter prestressed concrete cylinder pipeline (PCCP) constructed in the 1980s. A 380-foot long section of 72-inch

diameter PCCP was installed beneath Interstate Route 195 during its construction for use in connection with the pipeline between the reservoir pumping station and the reservoir. This section of pipe was manufactured by Interpace in the late 1970's. This vintage PCCP is suspect because of the type of prestressing wire used in its manufacture and the “inadequate” quality control used in the application of the mortar coating.

A rupture of this section of pipe could be catastrophic and result in major disruptions to Route 195. Repair costs could easily amount to several million dollars. Therefore, the section of pipe under Route 195 is dewatered and inspected bi-annually to monitor its condition.

The entire length of the pipeline was inspected in March of 2016. The interior concrete lining was sounded with a 57-inch piece of black iron pipe with caps welded to the ends. The lining was continuously sounded for hollow regions that may be indicative of a loss of prestress and therefore exterior pipe distress. Sounding was carried out on both sides of the pipe approximately in the 2-4 o'clock range and the 8-10 o'clock range at approximately 6 to 12-inch intervals. Other features such as spalled concrete linings were noted throughout the inspection. The Manasquan Reservoir 66-inch pipeline is in good condition. The items noted during the internal inspection were minor in nature and are not indicative of pipeline distress.

\$950,000 is included in the Renewal and Replacement Reserve to insert a 66” diameter steel pipe into the PCCP under Route 195 or to replace other sections of pipe as needed

#### Replacement of Pumps or Equipment

Five (5) 600-horsepower pumps are used at the Intake Pumping Station to pump water from the Manasquan River to the presedimentation pond at the Reservoir Pumping Station. Five (5) 900-horsepower pumps are used at the Reservoir Pumping Station to pump water from the presedimentation pond to the Reservoir. The estimated replacement cost for each unit, including a variable frequency drive, is \$650,000. Replacement costs for the units would be dependent on the problem but would be limited to the cost of replacement.

All pumps and motors have been physically inspected, vibration tested and pump efficiency tested in 2013 with retesting of some units in 2016. The reservoir pumps typically operate only 100 hours per year and at an average speed of only 630 rpm. Therefore wear on these units is minimal. Additionally, only one of the 5 river intake pumps gets significant hours of use each year. However, it is appropriate to include funds in a Renewal & Replacement Reserve to rehabilitate or replace a single unit in case of an unforeseen failure or damage from lightning.

Furthermore, these funds could be used to rehabilitate or replace other major equipment such as a large 500 KVA electrical transformer or cables as well. The combined construction cost for the Intake Pumping Station and the Reservoir Pumping Station was approximately \$30,000,000 (1990 dollars). The recommended reserve of \$650,000 represents 2% of the total construction cost.

## **Planned Capital Improvements - Fiscal Years 2018 – 2022**

### Replace Variable Frequency Drive at the Intake

The existing pump #1 has a pump curve suited to using a Variable Frequency Drive (VFD.) Replacing one of the VFDs at the intake for use with pump #1 will allow for capturing the exact amount of water that is needed to meet system demand in the winter when the reservoir is full.

### Resize Intake - Motor/Pump #3 VFD

A 2014 safe yield review has determined that replacing one of the 600-hp motor and pump at the intake with a 300 hp motor, a pump that can deliver up to 15 MGD and a new variable frequency drive will improve the reliable safe yield of the system. This project was programmed to be designed in calendar year 2017 and constructed in 2020. Design has been pushed forward to FY2018. This project will allow a closer match between the anticipated average customer sales from the intake pool and the intake pump capacities. The project is planned for 2020 to spread out the capital funds and because Pump #3 is in acceptable condition currently.

### Fueling System Upgrade

This project was completed in FY2017.

### Rehabilitation of Pumps and Motors at the Intake Pumping Station and Reservoir Pumping Station

There are five main vertical turbine pumps with 600-hp motors at the Intake Pumping Station (IPS). There are five main vertical turbine pumps with 900-hp motors at the Reservoir Pumping Station (RPS).

The Authority has undertaken a multi-faceted, multi-year program to service all ten pumps and motors. The first phase, which began in 2003, includes the servicing of a pump at the RPS and a motor at the IPS each year. All pumps and motors were physically inspected; vibration tested and pump efficiency tested once per year. In 2016, all but one were within acceptable performance tolerances. In FY2017, Pump #1 at the intake was fully rehabilitated at a cost of \$40,000.00.

### Security System Upgrades at the Reservoir

In response to the Public Health Security and Bioterrorism Response Act of 2002 and an Executive Order issued on July 18, 2002 by the State of New Jersey identifying critical facilities that require vulnerability assessments, the Authority contracted with a consultant to develop a comprehensive security vulnerability assessment (VA) and implement recommendations of the VA. Recommendations were provided for changes in security policies and procedures,

minimum and additional upgrades to the physical protection systems (PPS) and processes. Estimates of probable capital costs were developed for the minimum and additional PPS for system facilities.

The schematic design report for implementing the recommendations was and continues to be evaluated and improvements are being phased in. A web-based seven camera system and DVR was designed for the reservoir embankment and IO tower area and was installed in FY2017 at a cost of \$75,000.00. An additional mile of chain link fence is planned as the security upgrade for FY2018.

#### Replace Control Panel at Reservoir IO Building

The control panel at the reservoir IO tower is 25 years old and only the reservoir dam indicators report automatically. The system should be upgraded to maintain reliability of control from the central location at the top level of the I/O tower. Also, by replacing the panel with a PLC we will be able to combine all of the valve position information and operations into one LCD display and relay this information back to the office in Wall using the FIOS service that we now have in the building. Presently only one of the 8 electric valves can be controlled from the office in Wall Township.

#### Replace Automatic Data Acquisition System (ADAS) Embankment Monitoring computer and software at Reservoir

This system is original to the reservoir construction. The computer that collects and records information from the sensors will be replaced as well as the software and reporting system at the receiver end in the Administration office. We have requested that the existing system be reviewed by an outside consultant with the expectation that recommendations will be made to upgrade the existing system to a state of the art system.

#### Renovation of Traveling Water Screens

The eight traveling water screens at the Intake Pumping Station are in need of service over time. A 2015 inspection found all units to be in good condition except one which was refurbished in 2016. Funding is included to install new reducers, drive sprockets, screen sections, and chain guard assemblies on any of the remaining seven units. This also includes funding to rebuild the wash water pumps and motors if needed.

#### Variable Frequency Drive Replacement at the RPS

The VFD that controls the speed of the Motor for Pump #3 at the Reservoir pump station is being replaced in FY2017 with a new VFD. The cost is \$220,000 and the Robicon VFD will be replaced by a more efficient 900 HP VFD manufactured by Eaton Corporation. The replaced unit will be used as spare parts for the other three ASI Robicon brand VFDs. This should extend their life expectancy. The new unit will be speed adjusted from the existing Robicon sequencer /controller. As of July 2017 this project is 90% complete.

### Replace balance of metal roof on Admin portion of RPS building

Two thirds of the metal roof is original to the building in 1990. This portion of the roof needs to be replaced as there are several leaks during driving rains.

### Valve Operator Replacement on 36" Reservoir Return Line Guardian Valve

This project was successfully completed in FY2017 and the total cost with engineering was \$40,000.

### Variable Frequency Drive Control Conversion at the RPS

The existing ASI Robicon Corporation VFDs are controlled by an antiquated computer system for the operation and speed control of the variable frequency drives based on clearwell level. The conversion package would consist of replacing the computer sequencer at the Reservoir Pumping Stations from the current card rack computerized system to a programmable logic controller. With the current logic system, the Authority has been experiencing logic card failures along with expensive computer board repairs.

**PART III – PROPOSED RULE AMENDMENTS**

NEW JERSEY WATER SUPPLY AUTHORITY

AMENDMENTS TO THE SCHEDULE OF RATES, CHARGES AND  
DEBT SERVICE ASSESSMENTS FOR THE SALE OF WATER FROM THE  
MANASQUAN RESERVOIR WATER SUPPLY SYSTEM

**To Become Effective July 1, 2018**

The following rules and regulations can be found in the New Jersey Administrative Code under N.J.A.C. 7:11-4.1, et seq. Full text of the proposal follows (additions indicated in boldface **thus**; deletions indicated in brackets [thus]):

7:11-4.3 Operations and Maintenance Expense Component

(a) – (b) (No change.)

(c) Operations and Maintenance Expense Component:

<u>Effective Date</u>	<u>Rate/Million Gallons</u> (based upon a 19.443 per day sales base)
July 1, [2017] <b>2018</b>	\$432.87

7:11-4.4 Debt Service Cost Component

(a) (No change.)

(b) The following Debt Service rates based on a sales base of 15.008 million gallons per day, apply to all initial water purchase contract customers, and all delayed water purchase contract customers, who fully satisfied their contractual delayed water purchase surcharge obligations at the commencement of their contract terms:

<u>Period</u>	<u>Rate/Million Gallons</u>
7/1/[2017] <b>2018</b> to 6/30/[2018] <b>2019</b>	(Coverage 120%) \$570.55

(c) Delayed Water Purchase Surcharge will be assessed to all water purchasers who entered into a Water Purchase Contract for an uninterruptible service commencing subsequent to the System Operation Date (Delayed Water Purchase Contract). This includes a purchaser under an Initial Water Purchase Contract, which provides for an increase in the amount of uninterruptible service effective subsequent to the System Operation Date.

1. The following Debt Service rate based on a sales base of 4.435 million gallons per day, applies to the Delayed Water Purchase Contracts commencing July 1, 2001, October 1, 2002, and January 1, 2005 in lieu of the Debt Service rate set forth in (b) above.

<u>Period</u>	<u>Rate/Million Gallons</u>
7/1/[2017] <b>2018</b> to 6/30/[2017] <b>2019</b>	(Coverage 120%) \$664.96

(d) (No change.)

7:11-4.5 Source water protection fund component

(a) (No change.)

(b) The source water protection fund component is as follows:

<u>Period</u>	<u>Rate/Million Gallons</u>
7/1/[2017] <b>2018</b> to 6/30/[2018] <b>2019</b>	\$15.00

7:11-4.6 NJEIFP debt component

(a) (No change.)

(b) The NJEIFP debt component is as follows:

<u>Period</u>	<u>Rate/Million Gallons</u>
7/1/[2017] <b>2018</b> to 6/30/[2018] <b>2019</b>	\$24.93

**Appendix I. Report of CLA PC – Allocation of Headquarters General and Administrative Expenses – FY 2019**

**Appendix II. Report of CLA PC – Allocation of Headquarters General and Administrative Expenses – Audited FY 2017 Expenditures**
