DESCRIPTION OF RESERVE ACCOUNTS

Self Insurance Reserve (Liability)

This reserve is used to cover any excess liability payment above the Self-Insurance Retainer. Therefore, a Self-Insurance Fund was established and fully funded at \$250,000.

Depreciation Reserve Account

This reserve is intended to provide for the replacement of Authority machinery and equipment with a value of \$1,000 or more and a useful life in a range from three to ten years. The annual contribution to this reserve fund is predicated on the actual and/or estimated useful lives of three to ten years, depending upon the nature of this equipment. Depreciation has been determined for each such asset. These funds are needed to cushion the impact of replacement equipment purchases in order to provide more stable rates.

Reserve for Operations and Maintenance

A working cash reserve must be established at a level which reflects the amount of the regular annual operating costs plus an allowance for possible extraordinary requirements. The level of this reserve shall not exceed 25 percent of the amount appropriated by the Annual Budget for Operations and Maintenance Expenses for the current fiscal year.

Renewal and Replacement Reserve

The Renewal and Replacement Reserve is to be used for costs of Capital Improvements including repairs to facilities not covered by insurance and payment of extraordinary O & M costs. As per the terms of the project financing this Reserve is to be funded by the excess Debt Service Coverage revenues after 50 percent of the Debt Service Reserve amount has been accumulated.

Sediment Reserve

This reserve account is intended to provide in case extraordinary expenses are encountered with the sediment removal process from within the Intake Pumping Station. The reserve account may also be used to offset costs of future sediment removal projects from the Manasquan River or the sediment intake pool. The reserve account also provides funds that may be necessary to landfill the sediments if quality testing demonstrates some problem material. The reserve account has been determined to be held at a level near \$100,000.

Reserve for Formal Dam Inspection

This reserve, created in FY12, will receive annual contributions equal to one third the cost of the formal dam inspection which occurs every three years. The intention is to level the expenditure and eliminate the spike in expense that would otherwise occur every three years.

Other Post-Employment Benefits Reserve

The purpose of this fund is to establish a reserve for the payout of sick time to retired employees. Employees can receive up to a \$15,000 reimbursement for unused sick days upon their retirement.

IN-LIEU TAXES

This account covers the funds for Reservoirs and Pumping Stations in-lieu tax payment.

DESCRIPTION OF RESERVE ACCOUNTS

Major Rehabilitation Fund

The purpose of this fund is to establish reserves for the following uses: (i) to complete any project or, to the extent required, any portion of the cost of a project, (ii) for the costs of capital improvements, (iii) for the payment of extraordinary operation and maintenance costs, and (iv) for contingencies, including payments with respect to the prevention or correction of any unusual loss or damage in connection with the System or to prevent a loss of revenue therefrom, all to the extent not provided for in the current Annual budget or by reserves in the Operating Fund or from the proceeds of Bonds. Amounts in the Major Rehabilitation Fund shall not be used for the purposes specified in clauses (i) and (ii) above, unless the Authority has received a certificate from a consulting engineer in connection with the Annual Budget.

The minimum recommended balance to be maintained in this account, after October 1988, is 1.4 million.

Depreciation

This reserve is intended to provide for the renewal and replacement of Authority machinery and equipment with a value of \$1,000 or more and a useful life in a range from three to ten years. The annual contribution to this reserve fund is predicated on the actual and/or estimated cost of communication, automotive, heavy construction, transportation, shop and office equipment depreciated over their estimated useful lives of three to ten years, depending upon the nature of the equipment. Depreciation has been determined for each such asset currently in use, as well as for the current Fiscal Year additions and/or renewals.

Pumping Reserve

This reserve is in addition to the annual electrical costs for pumping provided for under the operating cost category. The operating costs for pumping are related specifically to an annual short-term operation of each of the ten major pumps at the South Branch Pumping Station and related electrical equipment and mechanical components. This is considered to be a minimum requirement for the effective preventive maintenance needs of this large facility. The preventative maintenance program must assure the useful life of the equipment, and further insure that the equipment be operable when it is needed for long-term use.

However, it is also considered a prudent step to maintain a pumping reserve to deal with extraordinary electrical expenditures, which will be required whenever a drought period occurs in the normal water cycle.

Operating Fund (O & M Reserve)

In order for the Authority to operate successfully and maintain its financial integrity and ability to attract future investors, reasonable working cash reserves must be established which are consistent with the regular operating costs plus possible extraordinary requirements. It is a requirement of the Bond Resolution that the Authority maintain a level in this reserve equivalent to three months of operating costs. (See Resolution No. 416, Sec. 505 - Adopted 11/17/88)

Self-Insurance Reserve

This Reserve is used to cover any excess liability payments above the Self-Insurance Retainer.

Reserve for Formal Dam Inspection

This reserve, created in FY12, will receive annual contributions equal to one third the cost of the formal dam inspection which occurs every three years. The intention is to level the expenditure and eliminate the spike in expense that would otherwise occur every three years.

Capital Equipment Reserve

The purpose of this fund is to establish a reserve for purchases capital equipment, including computer and facilities equipment, vehicles, and other various pieces of operational equipment.

Other Post-Employment Benefits Reserve

The purpose of this fund is to establish a reserve for the payout of sick time to retired employees. Employees can receive up to a \$15,000 reimbursement for unused sick days upon their retirement.

INDEPENDENT ACCOUNTANTS' REPORT ON APPLYING AGREED-UPON PROCEDURES

To the Commissioners of
New Jersey Water Supply Authority

We have performed the procedures enumerated below on the financial schedules for the fiscal year ending June 30, 2023. The procedures were agreed to by the New Jersey Water Supply Authority (a component unit of the State of New Jersey and responsible party) (the "Authority") solely to assist the Authority in evaluating the financial schedules in connection with setting of water rates for each of the three operating systems (Raritan, Manasquan Reservoir and Manasquan Treatment Plant/Transmission). The Authority's management is responsible for preparing and presenting the financial schedules in accordance with the guidelines for the presentation of schedules established by the American Institute of Certified Public Accountants.

An agreed-upon procedures engagement involves the practitioner performing specific procedures and reporting on findings based on the procedures performed. The Authority has agreed to and acknowledged that the procedures performed are appropriate to meet the intended purpose of the engagement, which is to assist the Authority with evaluating the underlying supporting documentation to determine the accuracy of the financial schedules in connection with setting water rates for each of the three operating systems. This report may not be suitable for any other purpose. The procedures performed may not address all the items of interest to a user of this report and may not meet the needs of all users of this report and, as such, users are responsible for determining whether the procedures performed are appropriate for their purposes.

The procedures and associated results are as follows:

1. We were provided with the fiscal year 2023 budgeted expenses for each of the three operating systems by the Authority's Director of Finance and Administration, who advised us that the fiscal year 2023 budgeted expenses are based upon preliminary budgets that are subject to approval by the Authority's Commissioners. We performed no procedures in regard to the fiscal year 2023 budgeted expenses.
2. We recalculated the allocated costs on the forecasted cost allocation schedules. We found no exceptions as a result of these procedures.
3. We compared the methodologies used for cost allocation on the forecasted cost allocation schedules to the methodologies used in the Authority's cost allocation schedules for the year ended June 30, 2021, and found them to be consistent.

We were engaged by the Authority to perform this agreed-upon procedures engagement and conducted our engagement in accordance with attestation standards established by the American Institute of Certified Public Accountants. We were not engaged to and did not conduct an examination or review of the subject matter, the objective of which would be the expression of an opinion or conclusion, respectively, about whether the forecasted cost allocation schedules are presenting the schedules in accordance with the guidelines for the presentation of schedules established by the American Institute of Certified Public Accountants. Accordingly, we do not express such an opinion or conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

**NOTES TO FINANCIAL SCHEDULES
YEAR ENDING JUNE 30, 2023**

NOTE 1 GENERAL

The New Jersey Water Supply Authority, as part of its annual budget and rate making process, performs a two-step cost allocation calculation. During the first step, the Authority forecasts its actual expenses by Cost Center. For purposes of this calculation the Authority uses the following Cost Centers:

Raritan System

- Building Headquarters
- Telephone Headquarters
- Safety
- Security
- Human Resources
- Purchasing
- Information Systems
- Contracts & Risk Management
- Financial Management
- Auto Shop
- Auto Shop - Canal
- Executive Office
- Engineering, Watershed Management, Operations and Maintenance (Raritan System)
- Manasquan System

In deriving expenses by Cost Center several expense reclassifications are made on the Schedule of Forecasted Cost Center Expense Reclassification as follows:

1. Heating and electricity expenses related to Building Headquarters ("HQ") and Executive Office are reclassified from Engineering and Operations & Maintenance ("O & M").
2. Vehicular fuel expense related to Auto Shop is reclassified from Purchasing.
3. Professional fees related to O & M are reclassified from the various departments to which they have been charged.
4. Insurance premium expense related to the Raritan System is reclassified from Contracts and Risk Management.
5. Telephone expense is reclassified from Purchasing to a separate Telephone HQ Cost Center.
6. Permit expense related to the Raritan System is reclassified from Contracts and Risk Management and Purchasing.
7. Workers' compensation expense related to the Raritan System is reclassified from Contracts and Risk Management.
8. In-lieu taxes related to the Raritan System are reclassified from Contracts and Risk Management.
9. Chief Engineer Salary & Fringe Expenses related to the Manasquan System are reclassified from the Engineering Department.

NOTES TO FINANCIAL SCHEDULES
YEAR ENDING JUNE 30, 2023

NOTE 1 GENERAL (CONTINUED)

The second step entails a step-down allocation of eleven of the Authority's Cost Centers to the Raritan and Manasquan System Cost Centers. In making this step-down allocation the Authority allocates costs as follows:

1. Building HQ is allocated to each of the Cost Centers based on the amount of space utilized.
2. Telephone HQ is allocated to each of the Cost Centers based on the number of telephones utilized.
3. Safety is allocated to each of the Cost Centers based on the number of employees.
4. Security is allocated entirely to the Raritan System.
5. Human Resources is allocated to each of the Cost Centers based on the number of employees.
6. Purchasing is allocated to each of the respective Cost Centers based on the number of purchase orders issued.
7. Information Systems is allocated to each of the Cost Centers based on the number of computers.
8. Contracts and Risk Management is allocated to each of the Cost Centers based on the number of employees.
9. Financial Management is allocated based on a percentage of the four remaining Cost Centers' budgets.
10. Auto Shop and Auto Shop-Canal are allocated based on the number of vehicles used.
11. Executive Office is allocated based on the amount of executive time utilized in managing each of the Systems.

NOTES TO FINANCIAL SCHEDULES
YEAR ENDING JUNE 30, 2023

NOTE 2 MANASQUAN SYSTEM ALLOCATED COST

The Manasquan Water Supply System's direct and allocated costs are then allocated between the Reservoir System and the Water Treatment Plant/Transmission System. In making this allocation the Authority adds to each System's direct expenses, the indirect costs allocated as follows:

1. Salaries and Fringe Benefits are allocated based on actual time studies performed by each employee throughout Fiscal Year 2021.
2. Vehicle related expenses are allocated based on the dollar value of vehicles held by each System.
3. Maintenance Supplies and related expenses are allocated based on the dollar value of capital equipment held by each System.
4. Office and miscellaneous expenses are allocated based on the time studies performed by each employee throughout Fiscal Year 2021.
5. Headquarters Overhead expenses are allocated based on the value of water contracts for each System.

INDEPENDENT ACCOUNTANTS' REPORT

To the Commissioners of
New Jersey Water Supply Authority

We have examined the conformity of the financial schedules with the cost allocation criteria set forth in Notes 1 and 2, of New Jersey Water Supply Authority (a component unit of the State of New Jersey and responsible party) (the "Authority"), for the year ended June 30, 2021, listed in the foregoing table of contents. The Authority's management is responsible for conformity of the financial schedules in accordance with the criteria set forth in Notes 1 and 2. Our responsibility is to express an opinion on the conformity of the financial schedules with the cost allocation criteria set forth in Notes 1 and 2, based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants, and, accordingly, included procedures we considered necessary in the circumstances. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether the financial schedules are in conformity with the cost allocation criteria set forth in Notes 1 and 2, in all material respects. An examination involves performing procedures to obtain evidence about the conformity of the financial schedules with the cost allocation criteria set forth in Notes 1 and 2. The nature, timing and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement on the conformity of the financial schedules with the cost allocation criteria set forth in Notes 1 and 2, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent of the Authority and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements related to our examination agreement.

In our opinion, the financial schedules present the Authority's allocation of costs to the Raritan and Manasquan Systems in accordance with the cost allocation criteria set forth in Notes 1 and 2, in all material respects.

This report is intended for the information and use of the Commissioners and management of the Authority, and is not intended to be, and should not be, used by anyone other than these specified parties.

**NOTES TO FINANCIAL SCHEDULES
YEAR ENDED JUNE 30, 2021**

NOTE 1 GENERAL

The New Jersey Water Supply Authority, as part of its annual budget and rate making process, performs a two-step cost allocation calculation. During the first step, the Authority forecasts its actual expenses by Cost Center. For purposes of this calculation the Authority uses the following Cost Centers:

Raritan System

- Building Headquarters
- Telephone Headquarters
- Safety
- Security
- Human Resources
- Purchasing
- Information Systems
- Contracts & Risk Management
- Financial Management
- Auto Shop
- Auto Shop - Canal
- Executive Office
- Engineering, Watershed Management, Operations and Maintenance (Raritan System)
- Manasquan System

In deriving expenses by Cost Center several expense reclassifications are made on the Schedule of Forecasted Cost Center Expense Reclassification as follows:

1. Heating and electricity expenses related to Building Headquarters ("HQ") and Executive Office are reclassified from Engineering and Operations & Maintenance ("O & M").
2. Vehicular fuel expense related to Auto Shop is reclassified from Purchasing.
3. Professional fees related to O & M are reclassified from the various departments to which they have been charged.
4. Insurance premium expense related to the Raritan System is reclassified from Contracts and Risk Management.
5. Telephone expense is reclassified from Purchasing to a separate Telephone HQ Cost Center.
6. Permit expense related to the Raritan System is reclassified from Contracts and Risk Management and Purchasing.

NOTE 1 GENERAL (CONTINUED)

7. Workers' compensation expense related to the Raritan System is reclassified from Contracts and Risk Management.
8. In-lieu taxes related to the Raritan System are reclassified from Contracts and Risk Management.
9. Chief Engineer Salary & Fringe Expenses related to the Manasquan System are reclassified from the Engineering Department.

The second step entails a step-down allocation of eleven of the Authority's Cost Centers to the Raritan and Manasquan System Cost Centers. In making this step-down allocation the Authority allocates cost as follows:

1. Building HQ is allocated to each of the Cost Centers based on the amount of space utilized.
2. Telephone HQ is allocated to each of the Cost Centers based on the number of telephones utilized.
3. Safety is allocated to each of the Cost Centers based on the number of employees.
4. Security is allocated entirely to the Raritan System.
5. Human Resources is allocated to each of the Cost Centers based on the number of employees.
6. Purchasing is allocated to each of the respective Cost Centers based on the number of purchase orders issued.
7. Information Systems is allocated to each of the Cost Centers based on the number of computers.
8. Contracts and Risk Management is allocated to each of the Cost Centers based on the number of employees.
9. Financial Management is allocated based on a percentage of the four remaining Cost Centers' budgets.
10. Auto Shop and Auto Shop-Canal are allocated based on the number of vehicles used.
11. Executive Office is allocated based on the amount of executive time utilized in managing each of the Systems.

NOTE 2 MANASQUAN SYSTEM ALLOCATED COST

The Manasquan Water Supply System's direct and allocated costs are then allocated between the Reservoir System and the Water Treatment Plant/Transmission System. In making this allocation the Authority adds to each System's direct expenses, the indirect costs allocated as follows:

1. Salaries and Fringe Benefits are allocated based on actual time studies performed by each employee throughout Fiscal Year 2021.
2. Vehicle related expenses are allocated based on the dollar value of vehicles held by each System.
3. Maintenance Supplies and related expenses are allocated based on the dollar value of capital equipment held by each System.
4. Office and miscellaneous expenses are allocated based on the time studies performed by each employee throughout Fiscal Year 2021.
5. Headquarters Overhead expenses are allocated based on the value of water contracts for each System.
